

Introduced predator interactions with an endangered native predator, the Pilbara northern quoll

FM: Taken from budget (no tables allowed there):

Parks & Wildlife contribution (totalling \$78,000) will come from industry offset funding allocated by Atlas Iron, designated for the specific purpose of offsetting the residual impacts on the Northern Quoll, and researching the management of feral cats in the Pilbara.

	Year 1	Year 2	Year 3
Consolidated Funds (Department of Parks and Wildlife)*	\$26,000	\$26,000	\$26,000
External Funds: Seeking financial support from industry for equipment and travel	\$50,000		
Charles Sturt Uni leverage funds	\$20,000		
PhD stipend and tuition fees (based on successful application)	\$50,288	\$50,288	\$50,288
Charles Sturt Uni operating funds for PhD (based on successful application)	\$5,500	\$5,500	\$5,500
Total	\$151,788	\$81,788	\$81,788
