Supervising Scientist Kathryn Schell 1.0

Related Science Projects

2023 - 041 Biodiversity Knowledge

2023 - 014 Species and Communities Assessment

Proposed period of the project

June 1, 2023 – June 30, 2025

Relevance and Outcomes

Background

The flora recovery team provides a range of science based support for flora conservation and recovery.

Aims

Develop strategic directions for translocations,

[variant=australian]Develop recovery plans for threatened species and ecological communities and contribute to regional conservation planning with scientific knowledge

[variant=australian][variant=australian]Recovery planning and teams leverage opportunities for stakeholder involvement.

[variant=australian][variant=australian]Provide advice to land managers on appropriate fire management strategies.

Expected outcome

[variant=australian]Strategic planning and guidance documents to guide flora conservation and conservation translocations proposals.

Coordination of recovery programs.

Provision of science-based advice benefits flora conservation programs.

Knowledge transfer

Publication of relevant reports.

Storage of flora data in TPFL/Boranga system.

Tasks and Milestones

Flora Wildlife Trade Management Plan

Threatened flora Recovery Plans

IUCN documents for listing of threatened flora

Chair, coordinate, report on Recovery Teams.
