

Threatened fauna conservation and recovery

Activities:

- Coordinate threatened species recovery programs (recovery teams, recovery plans, translocations)
- Maintain and manage the threatened and priority fauna database
- Undertake conservation status assessments (nominations for listing/delisting and change of status, support/facilitate TSSC)
- Coordinate and advise on the management, protection, recovery and significance of impacts on threatened and priority fauna
- Providing strategic advice and inform policy on fauna management issues and programs (commercial kangaroo harvest, pest native fauna, licensing, environmental impact assessments)
- Provide advice and strategic direction on animal welfare (Animal Ethics Committee)
