Improved fauna recovery in the Pilbara – benefitting the endangered northern quoll through broad-scale feral cat baiting

Closure goal

completed

Closure reason

This project was externally funded as part of the approval process for the Rio Tinto Yandicoogina JSW and Oxbow Iron Ore Project in the Pilbara. Western Australian State and Commonwealth environmental approvals via Ministerial Statement 1038 and EPBC Decision Notice 2011/5815.

The compliance conditions required Rio Tinto to contribute \$3M AUD towards an offset fund to be allocated to a Threatened Species Offset Plan to be spent over 5 years. This project formed the bulk of the Threatened Species Offset Plan and the funding target was reached by Rio Tinto during 2020.

The project is now complete with many excellent outcomes.

Knowledge Transfer

See above list of papers and reports.

Direct on-country project communications occurred with Robe River Kuruma (RRK) traditional owners (TOs). The project funded salary for ten TOs to participate in over 20 field trips, most individuals worked on multiple trips.

Annual project updates (Powerpoint Presentations) were delivered by Russell Palmer to Rio Tinto and the Robe River Kuruma Aboriginal Corporation. Project presentations, publications, and reports were also provided the local pastoralist (Corker Family of Red Hill), DBCA Pilbara regional staff and Australian Premium Iron Management.

A final Project Powerpoint presentation was provided to the RRK for their Annual General Meeting in 2020. This presentation was delivered by Arnold Bobby (TO) and well received by senior TOs.

Dataset links

All Project files and datasets are stored on Sharepoint under the Animal Science Program/Threat Management at [SP 2015-016 Yarraloola TSOP](#)

Camera trap images are stored separately in CPW Photo Warehouse, freely available software based in Microsoft Access. This information, raw and processed (tagged) images, is stored on three different external hard-drives kept at Woodvale.

All Project financial documents were provided to Vicki Hartshorn.

Hardcopy location

All original datasheets (all entered) are filed according to year and stored in a filing cabinet at Woodvale.
